EDUCATION

Erasmus Mundus in Sustainable Systems Engineering

M.S. in Computer and Systems Engineering

Compiègne, France

2025-2027

University of Florida

B.S. in Industrial and Systems Engineering

Economics and Sales Engineering

Gainesville, FL

2021-2025

Summa Cum Laude

PROFESSIONAL EXPERIENCE

Software Engineering Intern

Procter & Gamble

Cincinnati, OH

May 2026- September 2026

- Build a real-time warehouse digital twin with live telemetry and location data using React
- Develop an MCP server with semantic-layer integration, enabling LLMs to extract warehouse data
- Work in an Agile AI-driven SWE team using Jira, Git, FastAPI, TypeScript, and CI/CD

Warehouse Cost Savings Intern

Procter & Gamble

Cincinnati, OH

May 2025- August 2025

- Analyzed financial data to propose cost savings projects opportunity totaling \$7M
- Led a Loss Elimination cycle to root cause and drive out an annual \$500K warehouse shipment loss
- Created a new cost tracking system to monitor \$5M-valued opportunity areas

Supply Chain Planning Intern

Procter & Gamble

Cincinnati, OH

May 2024- August 2024

- Saved ~\$9M by creating a SKU allocation optimization model to automate inventory decisions
- Developed BI tools with SQL, Python, and PowerBI to save over 1,000 labor hours per year
- Fine-tuned an in-house LLM on company information for internal supply chain usage

Teaching Assistant

University of Florida

Gainesville, FL

April 2022 - April 2025

- Served as lead TA for 6 engineering, optimization, and data science courses
- Displayed complete mastery of engineering concepts through 1,540 hours of instructional support
- Created lesson plans, held lectures, and office hours to supplement student course learning

Undergraduate Research Assistant

Center for Applied Optimization

Gainesville, FL

May 2023 - May 2024

- Built multi-vehicle transportation optimization model using Python, openrouteservice, and NumPy
- Collaborated with teams to formulate objectives and constraints based on business requirements
- Applied optimization techniques to algorithmically solve large-scale logistics routing problem

Energy Analyst I

City of Gainesville - Energy and Business Department

Gainesville, FL

February 2023- November 2023

- Developed quarterly presentations to groups of 10-20 employees on energy and utilities optimization
- Enabled time savings of 654 hours for a team of 5 under imminent deadline using a VBA automation

PROJECTS AND PAPERS

Board Game Strategy Through Simulation - Awarded I/ITSEC 2025 Best Paper (Primary Author)

GatorPy - Built a custom Linear Programming solver from scratch in Python

SteelTime - Developed a VBA supply chain and order management module for a steel manufacturing firm.

HONORS, SKILLS, AND LEADERSHIP

- **Awards:** 2025 EMJMD, 2025 IITSEC Best Paper, 2024 H.S.G Scholarship, 2023 AI Days Finalist
- **Music:** Experienced guitar player and composer
- **Languages:** English (N), Spanish (C1), French (B1), Italian and Portuguese (A2), Greek (A1)
- **Programming Languages:** Python, JavaScript, Visual Basic, Ruby, SQL, MATLAB, LaTeX
- **Mastered softwares:** Git, PowerBI, Gurobi, SIMIO, Microsoft Excel and Office, and SAP
- **Certifications:** Six Sigma Green Belt, Florida Project Manager
- **Leadership:** ISE Ambassadors President, Audio Engineering Society Software Lead
